

SECC Organizes Third AMECSE 2017

Date published: 11 December 2017

The Software Engineering Competence Center (SECC), affiliated to the Information Technology Industry Development Agency (ITIDA), and in cooperation with the Association for Computing Machinery (ACM), will organize the Third Africa and Middle East Conference on Software Engineering (AMECSE), under the auspices of the ICT Minister Yasser Elkady, on December 12-13 in Cairo, Egypt.

Under the theme “Software Innovation for Smart Knowledge Cities”, AMECSE 2017 aims at leveraging the power of knowledge, modern software methods and technologies, and innovation to realize the ecosystem of the smart knowledge cities. AMECSE 2017 specifically promotes the contributions that discuss the deployment of the latest innovations in software engineering methods, technologies, practices and processes needed for developing smart knowledge cities.

AMECSE aims to identify modern software and systems technology used in developing and operating smart knowledge societies, as well as the various challenges facing these communities and the scientific methods and modern technologies used to deal with these challenges in practice.

AMECSE is a series of conferences started in 2014 as the first forum in the region for practitioners and researchers to present and share the most recent innovations, trends, experiences and concerns in the field of software engineering. Every edition of AMECSE fosters a theme that is deemed important for tackling pressing challenges in our region
